

Swiss TeraHertz GmbH

Company Mission: Terahertz technologies without barriers.

Technology and Value Proposition: Swiss Terahertz is a start-up based on some globally unique terahertz technologies previously developed at the SwissFEL. It specializes in the fabrication and R&D of terahertz systems including highly-efficient nonlinear organic crystals. The products of Swiss Terahertz can be integrated both into specialized research infrastructures and into commercial spectrometers for security inspection, pharma, and non-destructive testing.
